#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

## DETAILED ACTION

Applicant's election without traverse of claims 1-18 in the reply filed on 12-7-04 is acknowledged.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-18 are rejected under 35 U.S.C. 102(a) as being anticipated by Blyth et al. The reference to Blyth shows all of the structural features of the claimed invention. For example, Blyth teaches a memory array having a split gate transistor coupled with a select gate transistor, where the memory array has byte-alterable capability. See, the discussion at col. 7, l.43-50, and the structure shown in Fig. 7B. Blyth also teaches the various configurations claimed including common source/drain regions between the split gate device and the select gate device (col. 8, l.16), bit lines tied to the drains (col. 8, l. 20), and word lines tied to the control gates (col. 8, l. 19).

Blyth also teaches the particular dielectrics used, and the claimed circuit configuration. See, for example, the configurations shown in Figs. 6 and 7, and the discussions therein.

The Blyth memory array also operates in the same manner as the invention, however, with regard to claims 13-18, these limitations are considered to be equivalent to those contained in the method of operating the memory device claims, which have been restricted out from the structure claims being examined. Consequently, these limitations are analogous to process limitations in a structure claim, and add no patentable weight to the specific structure of the claimed invention being examined.
